

HELLENIC PLANT PROTECTION JOURNAL

In evaluating the paper, please consider the following points (except for papers submitted as New Records, to which several of the points do not apply):

- 1. The title should be short and accurate.**
- 2. The summary should state clearly and comprehensively the important points and findings.**
- 3. The introduction should contain only relevant background information and state the problem clearly.**
- 4. Materials and methods used and statistical treatment of data should be adequate.**
- 5. There should be a clear and accurate presentation of results in self-explanatory tables and figures of good quality.**
- 6. There should be new information derived from the work and conclusions justified by the results.**
- 7. There should be an appropriate treatment of relevant references.**
- 8. The whole paper should be well organized and of a balanced length in the various sections.**
